

OC-O/D-M74-218

DATE: 31 May 1974

MEMORANDUM FOR: Chairman, Office of Communications,
Equipment Board

SUBJECT : Antenna Working Group for Headquarters Area

REFERENCE : OC-M74-268 dated 21 May 1974

1. Antenna installations on all Agency Buildings in the Washington Metropolitan area must be approved by the Antenna Working Group. This group, consisting of representatives from the Offices of Security, Logistics, and Communications have and will continue to coordinate any proposed installations with other interested elements, including the "Fine Arts Committee", GSA, etc.

2. At present, the Headquarters Building is relatively "clean". Present installations include several small TV and VHF/UHF antenna installations that are quite unobtrusive. In addition, [] has the terminal ends of the [] [] These MW dishes are located in the south penthouse area and are difficult to disguise. It has been requested, that the six (6) foot radome on [] link be painted a light gray (presently forest green) to better blend into the skyline.
